Summary

I'm a Full Stack Web Developer with over 1 year of experience in building modern, responsive, and scalable web applications. My core stack includes HTML, CSS, JavaScript, Node.js, and MongoDB, with hands-on expertise in tools like Git, VS Code, Netlify, and Vercel.

I work with CMS platforms such as WordPress, Blogger, and Hostinger, and use frameworks like React.js, Express.js, Bootstrap, and Tailwind CSS to deliver full-cycle web solutions from development to deployment.

Experience

Full Stack Developer

Enkidu Technologies Pvt. Ltd.   July 2024 – Present

- Developed 20+ professional business websites and applications using WordPress, JavaScript, and the MERN stack.
- Managed hosting environments, domain setups and DNS configurations.
- Engineered scalable JavaScript-based applications with the MERN stack, focusing on modular architecture, performance optimization, and seamless frontend-backend integration.

Works & Projects

Vibrant-visuals.in – Live link
- E-commerce site for the parenting magazine *Iconic Parents*, built on WordPress and powered by WooCommerce.

Mansurja.in – Live link | GitHub
- Official website for Mans Urja Private Limited, built with React.js and Tailwind CSS. Designed a clean UI/UX with a modular design system.

VS Projects – Live link | GitHub
- A personal project hub showcasing all of my web development work. Built with React.js and React Bootstrap, hosted on Vercel with GitHub auto-deploy integration.
