Summary

I'm a Full Stack Web Developer with over 2 years of experience building modern, responsive, and scalable web applications. I specialize in creating complete web solutions — from frontend development and backend architecture to deployment and maintenance.

My core skills include HTML, CSS, JavaScript, PHP, MySQL, Node.js, React.js, Express.js, and MongoDB. I also work extensively with Bootstrap, Tailwind CSS, API integration, design systems, and modern web architectures to build high-performance digital experiences.

In addition to development, I have hands-on experience with deployment and hosting platforms such as Hostinger, Vercel, and Netlify, along with version control tools like Git and GitHub. I also work with CMS and website platforms including WordPress and Blogger to deliver flexible and user-friendly solutions.

Experience

Full Stack Developer

Feb 2026 – Present

Nexonic Web Solutions

- Developed and maintained custom web applications, including multi-vendor and bidding-based platforms, with scalable architecture and optimized performance.
- Contributed to the development and ongoing maintenance of a USA-based EdTech SaaS platform, ensuring reliability, feature enhancements, and seamless user experience.
- Specialized in building advanced admin panels and custom management systems, including sales dashboards, sub-admin panels, and role-based access control systems.

Full Stack Developer Executive

Sept 2025 – Feb 2026

Apna Digital Solution

- Developed 25+ professional business websites and web applications using WordPress and the traditional PHP (LAMP) stack.
- Built and maintained custom websites, admin panels, and e-commerce platforms tailored to client requirements.
- Managed end-to-end development, including frontend and backend integration using APIs and AJAX for seamless user experiences.

Full Stack Developer

July 2024 – Aug 2025

Enkidu Technologies Pvt. Ltd.

- Developed 20+ professional business websites and applications using WordPress, JavaScript, and the MERN stack.
- Managed hosting environments, domain setups and DNS configurations.
- Engineered scalable JavaScript-based applications with the MERN stack, focusing on modular architecture, performance optimization, and seamless frontend-backend integration.

Works

Stack Teacher – [Live link](#)

- Developed and maintained a USA-based EdTech SaaS platform featuring role-based access control, batch management, enrolment handling, discount coupon systems, batch video uploads, and payment gateway integration. Designed with a modern black-and-white theme focused on usability and scalability.

IntelliCode Solutions – [Live link](#)

- Built a modern, design system-driven business website with gradient-based UI, light/dark mode support, magnetic hover interactions, custom cursor effects, and responsive user experience using modern frontend technologies.

LedTVGuru – [Live link](#)

- Developed a fully functional e-commerce platform with category-based product management, advanced search and filtering, responsive UI, and a powerful custom admin panel for complete store management and operations.
